Skills

Experience of over 6 years combined between military and civilian in leading and maintaining a team with emphasis on readiness and training in a fast paced, high stress environment. Having been put in leadership positions early on has given me a strong work ethic and allowed me to become accomplished in all lines of work I have pursued. I am experienced with Microsoft Office, and company personalized web based software for correspondence, and possess a certification in Microsoft Excel. I am able to function quickly and efficiently in a team environment or on my own.
